

Pine Ridge Indian Reservation (Kyle, South Dakota) Spay/ Neuter project (June 2017)

We want to thank CARE so much for their support for our recent spay/neuter clinic we participated in on the Pine Ridge Indian Reservation 6/10-6/11/2017. We were able to spay 43 dogs and 8 cats, and neuter 30 dogs and 9 cats in two days of clinic. The community members also brought in 110 animals for various medications and vaccinations. 12 cats and dogs were taken in by Oglala Pet Project where we provided medical care before they were transferred to other no-kill rescues. We could not continue to host events like this without your generous support of \$15/surgery. We appreciate the opportunity your support allows with regards to helping these reservation animals which may not have access to any veterinary care other than these clinics.

Thank you again for your support!

Jess Braun, DVM
